

# Varn® Aqua Conditioner

Hardening agent for fully desalinated water

### Speciality product for all printing applications and press types

#### **Product Features**

- Varn® Aqua Conditioner is used in fully desalinated water to adjust the hardness to approximately 9°d, which is
  considered to be optimum water conditions for lithographic printing.
- Varn® Aqua Conditioner does not contain ingredients which will disturb the printing process.
- Varn® Aqua Conditioner stabilises the incoming water to press and therefore enables accurate and constant pH & conductivity values of the mixed dampening solution to be maintained.

#### Advantages of Varn® Aqua Conditioner

- Stabilises the water supply.
- Compatible with all fountain solutions.

## **Varn® Aqua Conditioner**

Features	Advantages	Benefits
Optimises water conditions.	Improved ink/water balance.	<ul> <li>Improved print quality.</li> </ul>
